Hello,

We have received the decision (Case number: VD/21/ [02.03.01.03/2024](#)) on our application for grant eligibility for sports activities.

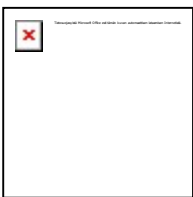

We have received the eligibility for recreational sports, which is not enough support to continue our activities. We have many players who are under the age of 18 or are unemployed, from who we cannot collect exercise fees. The donations we have been receiving are not regular and we are not sure if/how much we get in the future. To continue with our regular trainings and activities we need more support from the city.

We are looking for the support, mainly in two areas;

1. free or subsidized space pricing training facilities for badminton, volleyball, and football.
2. Finding space for football training, especially during the winters (air dome) has been a real struggle for us. Our application is rejected always. So some level of priority would be nice to have.

Regarding the rectification request, we would like to request for Eligibility for sports organizations instead of Eligibility for assistance for recreational exercise.

Kind regards

Himalayan Sports Club
